CAREER OBJECTIVE

Software Developer with hands-on experience in Python, Django, and REST API development, along with a strong understanding of cybersecurity fundamentals. Trained through Palo Alto Networks, AWS Academy, Cisco Networking Academy, and IIT Bombay, with experience in building secure backend applications and authentication systems. Interested in contributing to research-focused cyber range solutions and supporting the security of power grid and critical infrastructure systems.

TECHNICAL SKILLS

Programming & Scripting

- Python
- C, C++, Java

Backend & Web Development

- Django, Django REST Framework
- RESTful API Design
- Authentication & Authorization
- Secure Coding Practices

Cybersecurity

- Cybersecurity Fundamentals
- Network Security Basics
- Threat & Vulnerability Awareness

Tools

- Git, GitHub
- Linux Basics

Databases

- MySQL, PostgreSQL, NoSQL, MongoDB

EDUCATION

- **MTech – Computer Science & Engineering**
Dhanekula Institute of Engineering & Technology, Ganguru
2025 – Pursuing
- **BTech – Computer Science & Engineering**
Dhanekula Institute of Engineering & Technology, Ganguru
2020 – 2023
- **Diploma – Mechanical Engineering**
Dhanekula Institute of Engineering & Technology, Ganguru
2017 – 2020
- **SSC**
Gemini E.M High School
2016 – 2017

INTERNSHIPS & TRAINING

Cybersecurity Virtual Internship

Palo Alto Networks | EduSkills

March 2022 – May 2022

- Studied enterprise cybersecurity principles applicable to critical infrastructure
- Learned network threat vectors, firewalls, intrusion concepts
- Gained exposure to attack detection, incident awareness, and secure system design

AI–ML Virtual Internship

AWS Academy | EduSkills

July 2022 – September 2022

- Learned machine learning fundamentals, data preprocessing, and evaluation
- Understood cloud-based ML workflows
- Explored AI/ML use cases in infrastructure monitoring and security analytics

PROJECT EXPERIENCE

Secure Authentication System – Django

- Implemented secure login, registration, and logout
- Password hashing, session management
- Followed security best practices relevant to cyber environments

Vendor Management System – Django

- Built scalable backend system using REST APIs
- Integrated MySQL database
- Applied modular architecture for maintainability

Customer Management System – Django

- Developed API-driven backend using DRF
 - Implemented serializers, view sets, and access control
 - Ensured secure and structured data handling
-

CERTIFICATIONS & CREDENTIALS

Cybersecurity & Cloud

- Cybersecurity Virtual Internship – Palo Alto Networks & EduSkills
 - AI-ML Virtual Internship – AWS Academy & EduSkills
-

Programming

- PCAP: Programming Essentials in Python – Cisco Networking Academy (Nov 2021)
 - Basics of Python – Infosys Springboard (Apr 2023)
 - C Programming – Spoken Tutorial, IIT Bombay
 - C++ Programming – Spoken Tutorial, IIT Bombay (May 2021)
 - Java Programming – Spoken Tutorial, IIT Bombay (Jan 2022)
-

Additional Technical Experience

- Secure backend development for simulated environments
 - Cybersecurity fundamentals aligned with critical infrastructure
 - Cloud and ML exposure for attack detection & monitoring
 - Research adaptability and compliance with academic standards
-

ACHIEVEMENTS

- Participant, Andhra Pradesh State Jeet Kune-Do Championship
 - Participant, National Smart Olympiad (conducted by IIT's & Scientists)
 - Participant, SRR International Open FIDE Rating Chess Tournament, 2025
-

PROFESSIONAL EXPERIENCE

Lab Programmer

Dhanekula Institute of Engineering & Technology, Ganguru | 7th July 2025 – Present

- Assisting students with Python, C, C++, and basic software development concepts
 - Maintaining lab systems and ensuring smooth execution of practical sessions
 - Assisting faculty in preparing and testing lab programs and exercises
 - Gaining experience in academic and research-oriented technical environments
-

Software Developer

K Bhupal Engineers and Contractors Pvt Ltd, Karnataka | Sep 2024 – Apr 2025

- Developed and maintained Python-based backend modules
 - Assisted in building API-driven features and improving application functionality
 - Participated in debugging, testing, and improving existing software systems
 - Followed basic secure coding and documentation practices
-

Data Analyst

E-Tutor, Vijayawada | Jul 2023 – Mar 2024

- Supported students in programming and data analysis concepts
 - Performed basic data cleaning and analysis using Python and spreadsheets
 - Assisted in result interpretation and academic report preparation
-

ACADEMIC PROJECT

Title: Music Recommendation through Facial Emotion Detection using Deep Learning

Description:

- Developed an emotion-based music recommendation system using deep learning techniques.
- The system analyses facial images and classifies them into seven emotion categories: angry, disgust, fear, happy, sad, surprise, and neutral.
- Based on the predicted emotion, the system maps appropriate music playlists and recommends songs to the user.
- Gained hands-on experience in image classification, model training, and data-driven recommendation logic.
- This project demonstrates the ability to work with AI-driven systems, data analysis, and software integration, which are valuable skills for research-based development, intelligent systems, and security-related analytics.
