Summary

Professional with 3 years of experience in software development and knowledge of Python, C, Django, REST APIs and PostgreSQL. Experienced in guiding students in programming, developing web applications and analyzing data. Strong problem-solving skills with a willingness to learn and improve technical knowledge.

Skills

Programming Languages: Python, C, JavaScript
Frameworks: Django
Databases: MySQL, PostgreSQL, MongoDB
Developer Tools: Git, GitHub, Postman
Core Concepts: REST APIs, OOP, JWT Authentication

Experience

Programmer *Dhanekula Institute of Engineering and Technology* **July 2025 – Present**

- Guide students in Python, C programming fundamentals and practical Exercises.
- Collaborate with faculty on laboratory programs, assignments, and technical exercises.
- Identify and resolve programming errors during practical sessions and provide clear technical guidance.

Software Developer *K Bhupal Engineers and Contractors Pvt Ltd* **April 2024 – April 2025**

- Implemented updates to existing functionality through code changes, testing and troubleshooting.
- Debugged and tested software components to identify issues and improve application reliability.
- Contributed to API-driven features and backend components using restful development practices.

Junior Software Developer *Etutor* **July 2023 – March 2024**

- Performed data analysis and manipulation using Python libraries such as Pandas and NumPy.
- Created data visualizations, charts, and graphs using Matplotlib to present analytical findings effectively.
- Developed and maintained Excel-based dashboards to organize, analyze, and visualize data for reporting.

Projects

Attendance Management Web Application — HTML, CSS, JavaScript **2026**

- Developed a web-based attendance management application for recording and managing student attendance across multiple years, classes and sections.
- Implemented dynamic class and student management including configured student roll numbers and names.
- Built attendance tracking features to identify present, absent students and automatically calculate totals.
- Implemented daily attendance reporting with date, class, total students, absent count, and roll-number details.

Student Management System — Django, PostgreSQL, Django REST Framework **2026**

- Developed and deployed a web-based Student Management System using Django and Django REST Framework with role-based access for administrators, faculty and students.
- Implemented student, faculty, task, leave and attendance management with PostgreSQL database integration.
- Implemented authentication, role-based authorization, CRUD operations and REST API endpoints.

Awards & Certifications

- **Python and Django Full Stack Web Developer: Python Developer** – Python (2024): Validated expertise in Python programming and web development.
- **Python Django - Build Complex MultiVendor Ecommerce System** – Django (2024): Certified in API testing, documentation and collaborative API development.

Education

B.Tech(CSE) **Graduated: 2024** *Dhanekula Institute of Engineering and Technology, Ganguru*
